

ESSELYA 40

Electrophoresis Automated
System

LABORATORY

Fast/Versatile

4/40 samples, up to 5 electrophoresis membranes 8 samples each.

Allows to perform the most common techniques:

- Serum Proteins
- Haemoglobins
- Lipoproteins
- Urinary Proteins

Complete Automation

ESSELYA 40 automatically arranges the loading of all the reagents to standardize the delicate electrophoretic process.

During test all the liquid are constantly measured and adjusted, minimising the variables introduced by reagents level variations and to ensure the test preparation in true complete automation.

Productivity

Serum-Proteins : 24 samples / 1h:15'

Lipoproteins: 16 samples / 1h:15'

Haemoglobins: 16 samples / 1h:15'

Serum Proteins

Haemoglobins

Lipoproteins

Software features

User interface: monitor, keyboard and mouse

Minima recognition: automatic

Managing techniques: adjustable techniques in times,
migration voltage/current

Operating system:

ESSE3 srl, Via Garibaldi 30
14022 Castelnuovo D.B. (AT)
